ANSHIKA SAHU

LinkedIn | anshikasahu3464@gmail.com | +91 9407320426 | github.com/AnshikaSahu3464 | Indore, Madhya Pradesh, India

PROFESSIONAL SUMMARY

Final-year Computer Science & Information Technology student (B.Tech, 2027) with hands-on experience in Python, REST APIs, React, and software development. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS, and SDLC, with experience building and debugging application features. Familiar with Git, Linux, CI/CD, cloud fundamentals, and secure software development practices, with additional exposure to Machine Learning and Generative AI.

EDUCATION

Bachelor of Technology — Computer Science & Information Technology 2023 – 2027 (Expected)
Chameli Devi Group of Institutions, Indore (M.P.)
CGPA: 7.6 / 10 | Currently in Final Year (4th Year, 7th Semester)

Higher Secondary (Class XII), MPBSE 2023
Motherland Higher Secondary, Indore (M.P.) | Score: 78.4%

Senior Secondary (Class X), CBSE 2020
St. Vincent Pallotti Senior Secondary School, Indore (M.P.) | CGPA: 8.3 / 10

EXPERIENCE

Machine Learning Trainee | *Ypsilon IT Solutions*

- Engineered an end-to-end loan approval prediction system in Python, applying supervised learning and object-oriented programming to automate credit risk assessment on real-world financial datasets.
- Built and debugged data-preprocessing pipelines with feature selection and class-imbalance handling to improve model reliability.
- Implemented and tuned Logistic Regression, Decision Tree, and Random Forest models, evaluating performance using Accuracy, Precision, Recall, and F1-Score.

GenAI Powered Data Analytics — Virtual Experience | *Tata Group (via Forage)*

- Conducted exploratory data analysis (EDA) and built risk-profiling frameworks to proactively identify customer delinquency factors.
- Designed predictive logic and continuous-learning feedback loops to support an AI-driven collections strategy.
- Created stakeholder-ready business summaries and executive presentations, translating complex model logic into non-technical insights.

PROJECTS

AI Chat Application (GenAI Integration) | *React, JavaScript, LLM APIs*

- Developed a real-time conversational web application using React and REST-based LLM API integration, implementing API request handling, response processing, and debugging for reliable user interactions.
- Designed and implemented a responsive chat interface with API integration, focusing on reusable components, error handling, and user experience.

CareAstra — Hospital & Patient Care Platform | *React, REST APIs, Vercel*

- Built and deployed a responsive healthcare platform using React and REST APIs, implementing doctor profiles, symptom guidance, and appointment-booking workflows.
- Developed reusable React components and integrated backend APIs, applying input validation and structured application flows for a reliable user experience.

Loan Approval Prediction System | *Python, Machine Learning, Scikit-learn*

- Built and evaluated a machine learning pipeline for loan approval prediction using real-world financial datasets.
- Applied data preprocessing, feature engineering, and model evaluation to compare classification approaches.

TECHNICAL SKILLS

Languages: Python, C++, Java, SQL
Software Engineering: Data Structures & Algorithms, OOP, DBMS, SDLC, Debugging, REST APIs
Web & Backend: React.js, Django, Flask, FastAPI, HTML, CSS
Databases: MySQL, SQLite.
Tools & DevOps: Git, GitHub, Linux, CI/CD, VS Code, AWS
AI & ML: Machine Learning, Generative AI, LLM API Integration, Pandas, NumPy, Scikit-learn, EDA

CERTIFICATIONS & BADGES

- Tata × Forage — GenAI Powered Data Analytics Job Simulation | Deloitte × Forage — Data Analytics Job Simulation (2026)
- AWS Academy — Machine Learning Foundations Training Badge (2026)
- Google Cloud — Innovating with Google Cloud Artificial Intelligence | MLOps with Vertex AI: Model Evaluation (2026)

ADDITIONAL

- 36-hour Hackathon participant, Prestige College, Indore | Completed Java training at Chameli Devi Group of Institutions.
